

If you are a Gmail client and are having trouble receiving email from our firm, or if our messages keep ending up in your SPAM folder, there are a couple of options you might want to try.

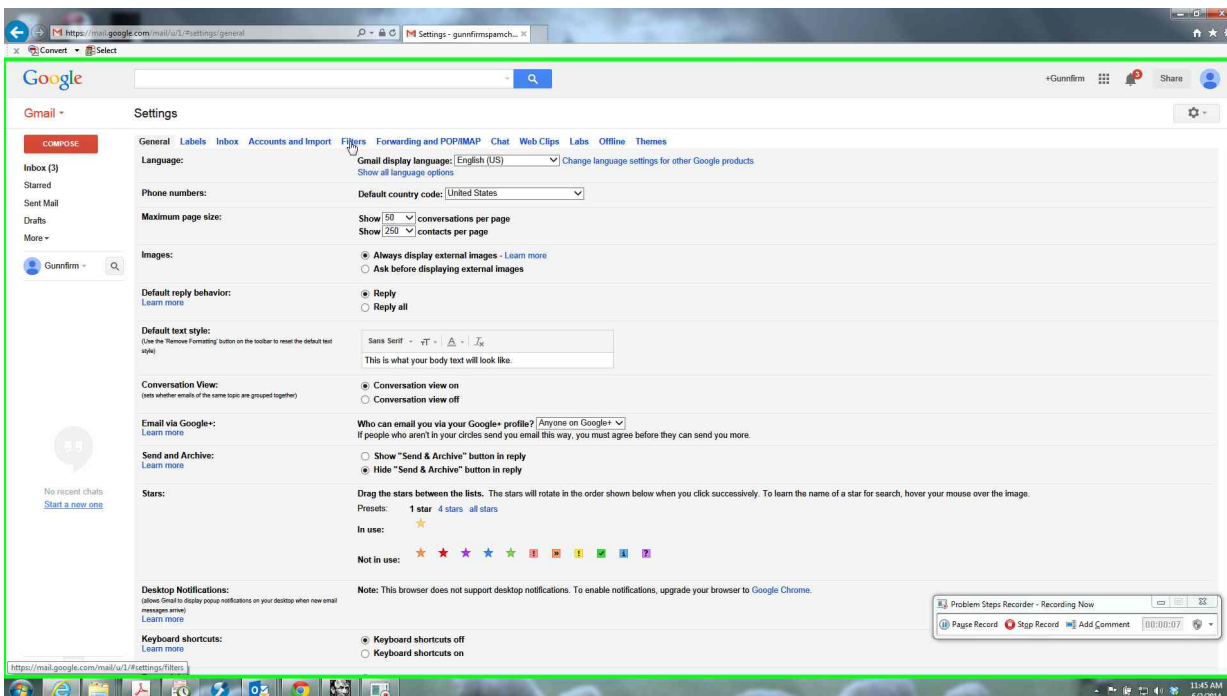

First. Find one of our email messages and “Reply” to the message. That will add the sender to your contacts. Often messages sent from your “contacts” receive favorable treatment by Gmail.

Second. Check your SPAM folder. This folder is not generally shown on your mobile device, so you will need to log into your Gmail account online to see the folder. Find the missing message, and mark as “not spam”. This will move the message to the Inbox, and may help with other messages from our firm.

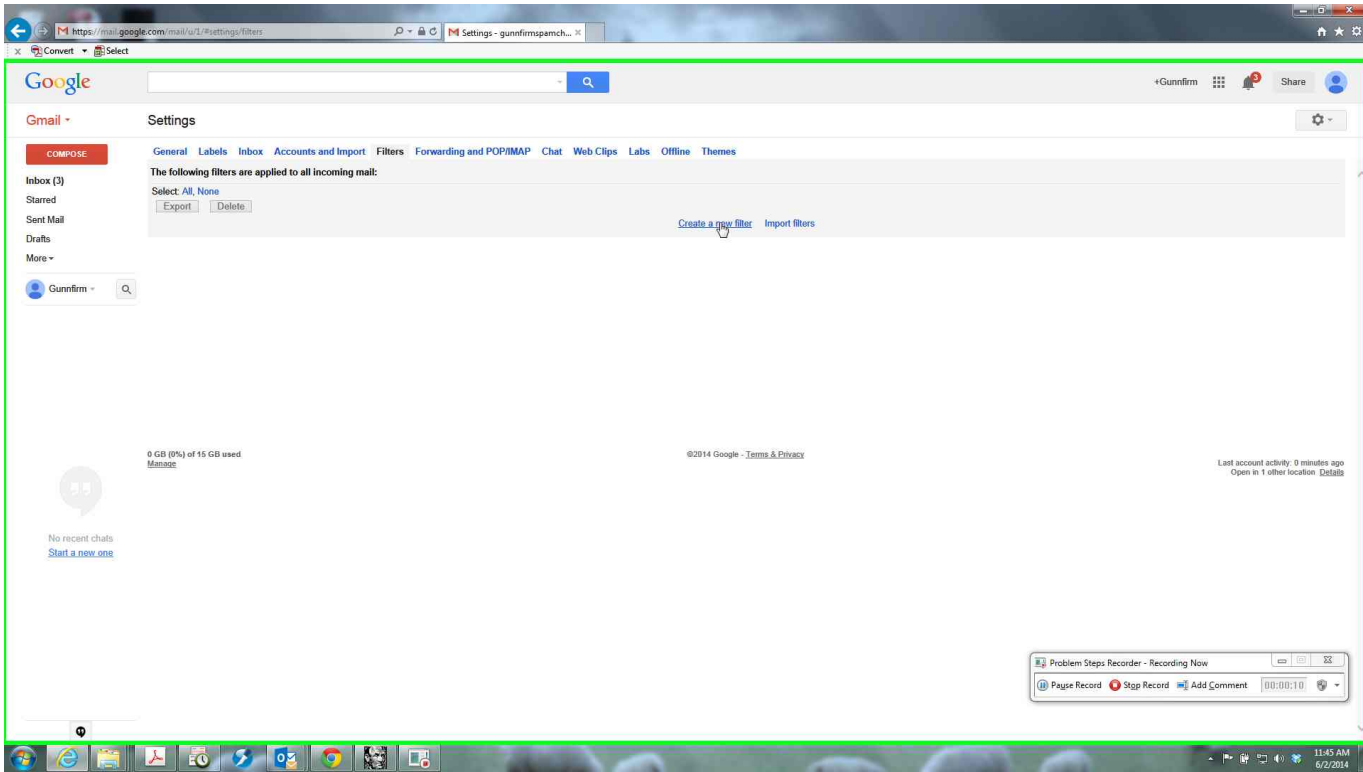

Third. Create a specific filter for messages from our firm. To do this, log into your Gmail account. Click on the “gear” on the right side, and then select “Settings”

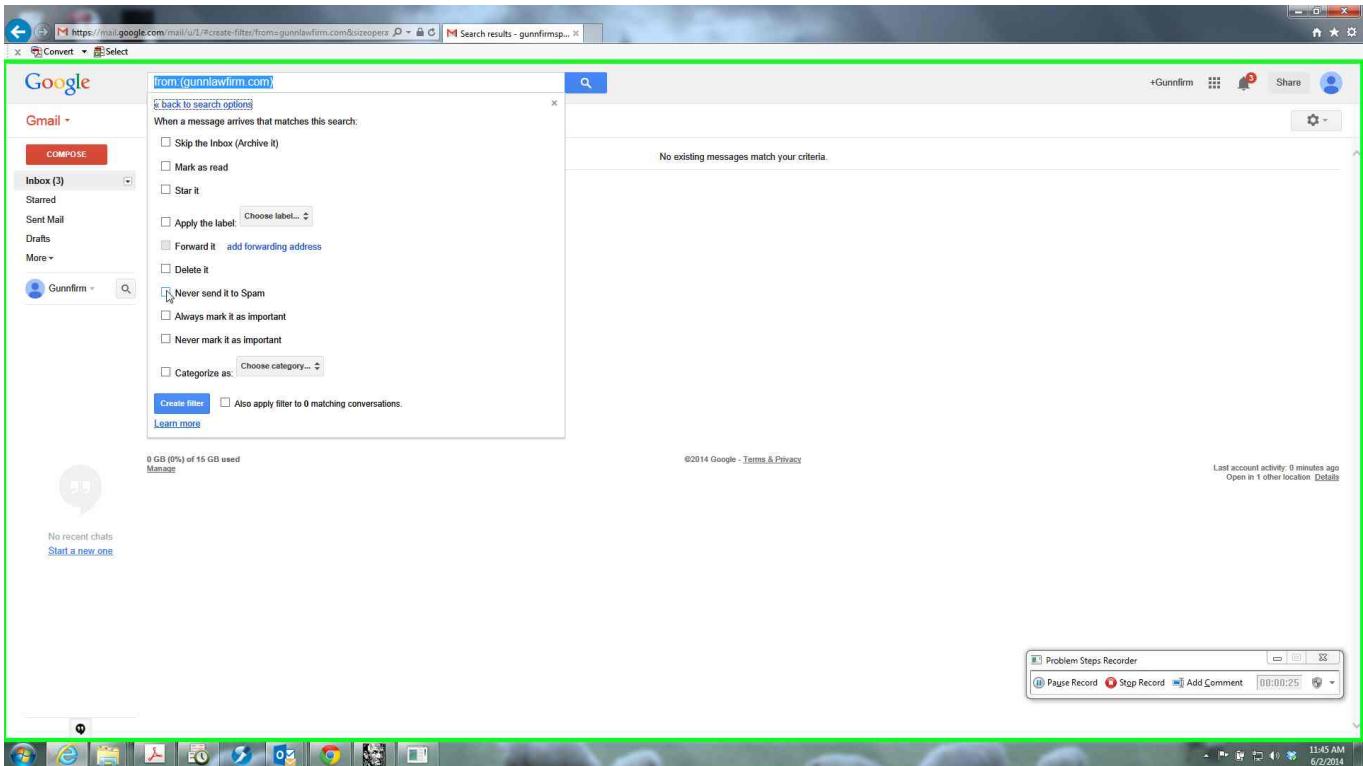

On the next screen, under Settings select “Filters”

On the next screen, select “Create a new filter”

In the “From” field, type in **gunnlawfirm.com**. Leave all other fields blank, and then select “Create filter with this search”. On the next screen select “Never Send it to Spam” and then select the “Create Filter” button.

That’s it! You should now receive email from our firm without further difficulty.
